Steps for Installation:

1. Make sure that the electrical circuit is free of voltage (master switch off)
2. Loosen allen screws on side of baseplate.
3. Remove base plate from fitting.
4. Install base plate to wall in desired location using appropriate screws for application.
5. Seal all holes including cable entry and around screws.
6. Connect the cable - use wire with earth; connect the earth first, then live and neutral wire.
7. Reattach fitting to base plate making sure allen screws are tight to avoid any water penetration.
8. Fitting is preset to 3000k, to change remove cap by twisting anti clockwise and set aside.
9. Slide switch located behind reflector to desired colour temperature.
10. Reattach cap by twisting clockwise making sure it is tight and seals are still in place to avoid any water penetration.
11. Apply silicon around edge of fitting to prevent any water from getting inside to electrical connections.
12. All connections must be carried out carefully, inspect all contacts before switching back on the electric circuit.
