

JetDryer

Fast, Efficient, Hygienic Hand Dryers

Introduction

JetDryer is an Australian brand, established in 2010 as a distributor of high-speed premium quality hand dryers to the Australian and New Zealand markets.

Today, JetDryer offers one of the largest ranges of faster, more hygienic and cost-effective hand dryers. From the premium ultra high-speed JetDryer Executive² to the space-saving JetDryer Mini, we have a model to suit all applications and budgets. JetDryer also markets the unique JetBot, a fast and fun hand dryer designed for use by children in educational or care environments.

All models are built to the highest standards, and as a result we offer a 3 year parts, 1 year labour warranty (or 1 year parts and labour for the Business² model) to provide our customers with the peace of mind they deserve.

JetDryer has an extensive network of business partners across the country, including electrical and plumbing wholesalers, washroom equipment resellers, and managed washroom providers. This provides our customers with greater choice when deciding to purchase a JetDryer product. We support this network by offering fast and reliable delivery services to any location nationally via our distribution centres in Sydney, Melbourne, Brisbane and Perth.

Welcome to the next evolution in hand dryers, and thank you for considering JetDryer.

JetDryer Benefits

Ultra-fast

Offering one of the fastest hand dryer air speeds in Australia at up to 150³m/s.

High Quality

Manufactured from thick ABS polycarbonate or die-cast aluminium, and all models include 3 years parts and 1 year warranty, excluding Business² which offers 1 year parts and labour.

Water Collection

Most models collect the water removed from hands to reduce the mess and risk of wet floors.

Saves Time & Power

Can dry hands in half the time and up to half the power of other hand dryers.

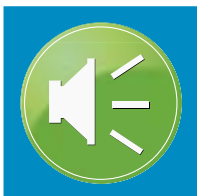

Hygienic

Anti-bacterial and HEPA air filtration options remove up to 99.95% of bacteria, and all models feature touch free operation.

Environmentally Friendly

Uses less energy, reduces towel waste in landfill and the number of trees cut down for paper = greener planet.

Quiet

Less noise than most other hand dryers, with an operating noise level as low as approximately 70 dBA from 1 metre away.

Saves Money

Annual cost savings of up to 85% compared to conventional hand dryers, and potentially even more when compared to paper towels.

JetDryer Cost Savings

Save time, save money, save energy

JetDryer hand dryers save energy as they consume less power via a high speed motor.* The resulting shorter drying time, in combination with lower power consumption, is the key to saving money in the long run.

The cost for each use of a JetDryer is approximately \$0.0009c, and as the below calculator shows, annual cost savings of up to 80% can be achieved compared to conventional hand dryers.*

Conventional dryer vs. JetDryer

35 seconds to dry...
2400 watts of energy

12 seconds to dry...
1000 watts of energy!*

COST SAVINGS CALCULATOR

Based on 100 people per day @ 365 days in use per year

Power consumption of Typical Hand Dryer = 2400 Watts

Typical Hand Dryer Costing

Consumption Per Use	Cost Per Use
19.4 Watts	\$0.0045

Note: Assumes use for an average 35 secs @ \$0.23 per Kwh

You get the equivalent of approx. 5 Jet Dryer hand dries for the same cost as 1 conventional hand dryer use.

Cost Per Day = \$1.125

Note: Assumes 100 people at an average of 2.5 visits per day

Cost Per Year = \$410.63

Power consumption of Executive² JetDryer = 1000 Watts

Executive² JetDryer Costing

Consumption Per Use	Cost Per Use
4 Watts	\$0.0009

Note: Assumes use for an average 12 secs @ \$0.23 per Kwh

Cost Per Day = \$0.225

Note: Assumes 100 people at an average of 2.5 visits per day

Savings Per Day = \$0.90

Savings Per Year = \$328.50

% Savings = 80%

JetDryer is a hygienic, fast, efficient and stylish way to dry your hands.

* This information is approximate and relates to the JetDryer Executive 2 model. Power consumption of other models may vary. Please refer to each individual specification.

JetDryer Executive²

The ultra high-speed hand dryer for faster, hygienic hand drying

The JetDryer Executive² is a very sleek and stylish hand dryer, with smooth curving lines on all surfaces. It features an ultra high-speed adjustable brushless motor with advanced jet technology for fast hand drying times and low noise output. With easy servicing and water catchment, the Executive² helps maintain a quieter, cleaner, safer and more user-friendly washroom environment.

Save time,
save money,
save energy

Elegant, hygienic and cost-effective

The JetDryer Executive² is the most hygienic, fast, efficient and stylish way to dry hands in any washroom.

The JetDryer Executive² is based on a simple yet powerful idea - using the heat from its own motor to provide the warm air required to dry your hands. This means it uses much less power than conventional hot air hand dryers.

Easy to use

To use the JetDryer Executive², simply insert your hands, and three infrared sensors commence the jet flow. The JetDryer Executive² supplies powerful gusts of high-speed air to both sides of the hands as they are raised and lowered, which removes the water efficiently and effectively. After around ten seconds, remove your hands and they're completely dry.

Better for the environment

The JetDryer Executive²'s high-speed vacuum motor saves energy as it consumes only 1000 watts of power. The shorter drying time combined with lower power consumption saves money with annual cost savings of up to 79% compared to conventional dryers, and reduces your carbon footprint.

Quiet and user-friendly

The JetDryer Executive² is very quiet, and produces a fragrance during operation that is both refreshing and relaxing. The design of the unit is ergonomically stylish and elegant, and suits modern washroom decor.

**HIGH-SPEED
ENERGY
EFFICIENT**

JetDryer Executive²

How it works

3 infrared sensors detect your hands and minimise energy loss by eliminating detection errors. The JetDryer Executive² uses touch-free activation technology, ensuring maximum hygiene and minimum contamination.

Anti-bacterial filter

A grade 13 HEPA air filtration system provides 99.95% clean air, and the natural fragrance provides an incredibly refreshing experience for the user.

Technical Specifications

Item category	Performance
Model Number	JDEXEC2-S & JDEXEC2-W JDEXEC2-B & JDEXEC2-G
Operating voltage	230-240 Vac, 50-60Hz, 700 - 1000 watts
Air speed	175 m/s @ 1000 watts
Motor type	30,000 RPM, 2 speed adjustable brushless DC motor
Rating power	1000 watts
Drying time	10 - 15 seconds
Circuit operation	Infrared automatic, self adjusting
Timing protection	20 seconds auto shut off
Drip proof	IP33
Isolation	Class II
Water tank	LED indicator when tank is full
Filter Sensor	LED indicator when filter is full
Air freshener	Organic ocean breeze fragrance
Net weight	9kg
Unit size (W x H x D)	330 x 670 x 230mm
Finish	Fireproof ABS, 94V0, PMMA, UV Coated
Decibel rating	75 dBA @ 1 mtr
Approvals	IEC/EN60335-1 & IEC/ EN60335-2-23 Compliant to EMC directive according to EN55014-1, EN55014-2, EN61000-3-2, EN61000-3-3
Power connection	3-pin plug and lead

Three infrared sensors detect your hands

High-speed air jet dries hands in ten seconds

Energy efficient, using heat from its own motor to dry hands

Lockable drip tray with LED indicator when full

LED lights indicate blue when filter needs to be changed

Attractive modern design with blue LEDs add to the sense of style

Touch-free activation ensures hygiene and minimal cross-contamination

Antimicrobial coating

HACCP Endorsed

Warms the air by cooling the motor

Unlike conventional hand dryers, the JetDryer Executive² generates warm air without using a heater. It does this by using a compulsive air-cooling system. Heat is taken from its 30,000 RPM motor, and air reaches a speed of 175m/s, saving energy and money.

3 infrared sensors

A conventional touch-free hand dryer often has only one sensor, which can result in a failure to detect when hands are placed ready for drying. The JetDryer Executive² has three infrared sensors, which detect your hands from three different directions simultaneously, reducing the chance of errors. This means the unit operates accurately and only when required, reducing operating costs and saving you money.

Advanced burn proof plastic

The JetDryer Executive²'s exterior is made from burn proof ABS engineered plastic, which is both hard-wearing and rust proof. It protects the unit from bacteria and viruses with Ionpure[®] antimicrobial coating.

Easy to control

Motor speed adjustment with two speed settings gives you greater control over the unit, providing greater energy savings when required.

Quiet

A Noise Absorption Module (NAM) minimises noise by absorbing air friction and mechanical sounds. The reduction in noise levels makes the unit more enjoyable to use and less of a distraction, helping to reduce stress in the workplace.

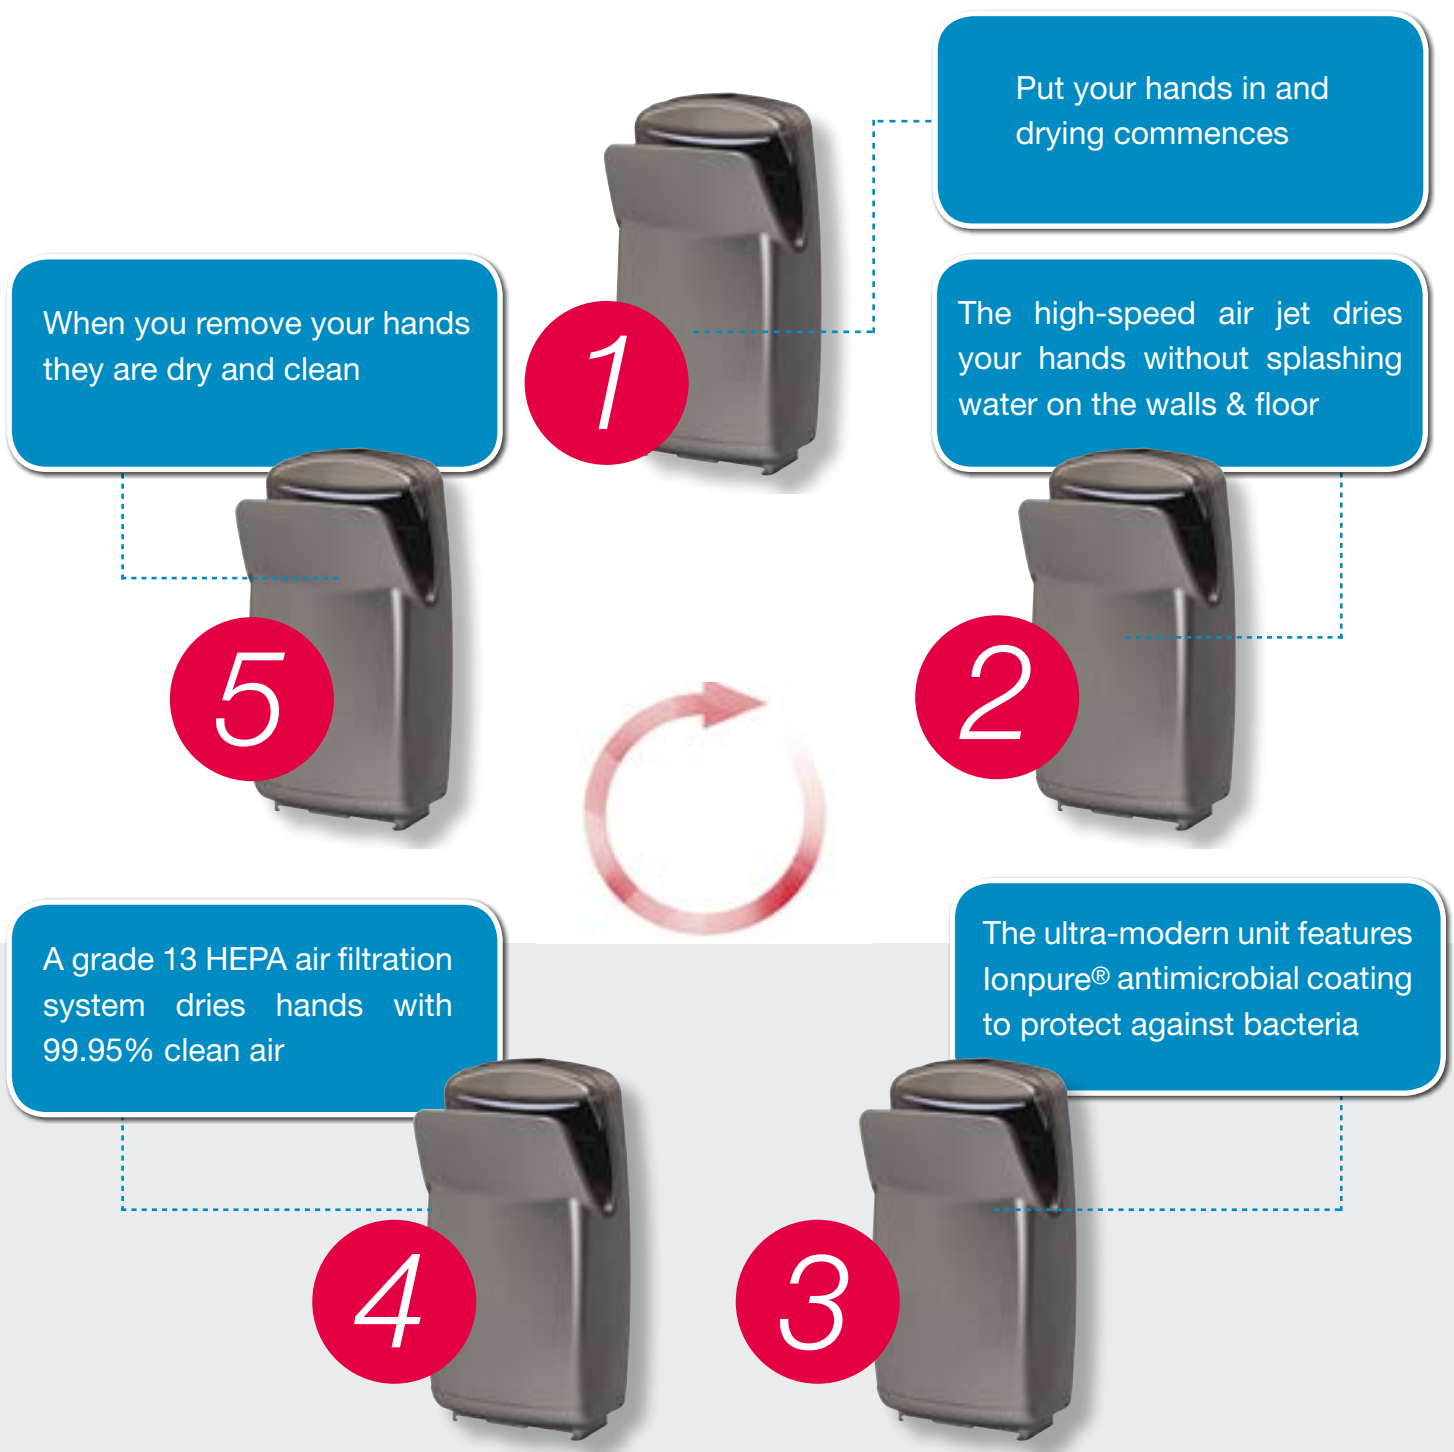

CONSUMABLES	
JDEXEC2-HF	HEPA air filter, removes 99.95% of bacteria, includes fragrance
JDEXEC2-PF	Pre-filter (5 pack)
JDEXEC2-CB	Cleaning brush
JDEXEC2-FF	Fragrance block

JetDryer Executive²

Advanced safety features

The JetDryer Executive² is packed with safety features, so you can feel comfortable knowing that you will be providing a solution that is reliable, safe and effective:

- A timer automatically shuts the dryer off after a set period;
- A temperature sensor stops the motor at temperatures over 70°C;
- The ESC (Electric Shock Free Circuit) senses humidity inside the unit and shuts off the power when required;
- The unit has a self-diagnosis function which monitors and reduces errors;

Servicing and maintenance

Fitting, servicing and maintenance of the JetDryer Executive² is extremely easy, saving you time and money and keeping your washroom in excellent shape. The unit can be cleaned with a soft towel and warm water, using a little detergent if required. The JetDryer Executive² is supplied with the HEPA filter and fragrance block, both of which are simple to replace when required. The JetDryer Executive² is even smart enough to tell you when these need to be replaced, and when the water tray needs to be emptied.

Choice of colours

The JetDryer Executive² comes in a choice of four stylish and elegant colours that will match any washroom environment, improving the appearance of the premises and adding a touch of modern style.

Silver

Metallic silver styling is modern and clean, ideal for environments that need to impress.

JDEXEC2-S

White

Designed to blend in against the white décor of washrooms, the classic white colour is both elegant and discreet.

JDEXEC2-W

Blue

Bring a refreshing cool look to your washroom with the JetDryer Executive² in blue.

JDEXEC2-B*

Gold

Stand out from the crowd. The metallic gold JetDryer Executive² adds a splash of life and energy to your washroom.

JDEXEC2-G*

* Note: Minimum quantity 50 units

JetDryer Business

The high-speed
hand dryer that
is fast, smart and
efficient

How it works

The JetDryer Business is based on a simple yet powerful idea - using the heat from its own motor to provide the warm air used to dry your hands.

The brush-less motor saves energy as it consumes only 850 watts of power. This means the JetDryer Business uses much less power than conventional hot air hand dryers, saving you money and reducing your carbon footprint.

Easy to use

To use the JetDryer Business, simply insert your hands, and three infrared sensors commence the jet flow. The JetDryer Business supplies powerful gusts of high-speed air to both sides of the hands as they are raised and lowered, which removes the water efficiently and effectively. After around ten seconds, remove your hands and they're completely dry.

Technology and style

The JetDryer Business uses a high speed brush-less motor to create a jet air flow that will dry your hands in around 10 seconds. It also adopts CPU control technology with a wide LCD display. The LCD screen counts down the time to dry your hands, and the dryer will stop automatically at the end of the counter. It is very quiet, and produces a natural air fresh aroma that is both refreshing and relaxing. The design of the JetDryer Business is ergonomic, stylish and elegant.

Better for the environment

The JetDryer Business's high-speed brush-less motor saves energy as it consumes only 850 watts of power. The shorter drying time combined with lower power consumption saves money with annual cost savings of up to 85% compared to conventional dryers, and reduces your carbon footprint.

Moving beyond paper towels

Paper towels are wasteful and old-fashioned. They create waste that litters the washroom, and their production creates poisonous materials such as dioxins. With the JetDryer Business there are no paper towels to dispose of, and three LED sensors ensure it only activates when needed.

JetDryer Business

Warms the air by cooling the motor

Unlike most other hand dryers, the JetDryer Business generates warm air without using a heater. This is achieved by using a compulsive air-cooling system. The heat is taken from its motor, saving energy and money.

The JetDryer Business features a high-speed brush-less motor to produce a jet air flow, with the air reaching speeds of up to 120m/s. This results in the unit only taking around 10 seconds to dry your hands.

Technical Specifications

Item category	Performance
Model Number	JDBUSI-S & JDBUSI-W
Operating voltage	230-240 V, 50Hz
Air speed	120 m/s
Motor type	ICP Brush-less motor
Display	LCD Instruction + countdown
Rated power	850 watts
Drying time	Under 10 seconds
Circuit operation	Infrared automatic, self adjusting
Timing protection	30 seconds auto shut off
Drip proof	IPX1
Isolation	Class I
Net weight	11kg
Shipping weight	13kg
Unit size (W x H x D)	292 x 650 x 250mm
Finish	ABS silver/white
Decibel rating	70 dBA @ 1 mtr
Approvals	IEC/EN60335-1 & IEC/ EN60335-2-23 Compliant to EMC directive according to EN55014-1, EN55014-2, EN61000-3-2, EN61000-3-3
Power connection	3-pin plug and lead

The JetDryer Business is CPU controlled with an LCD display, counting down the time it takes to dry your hands.

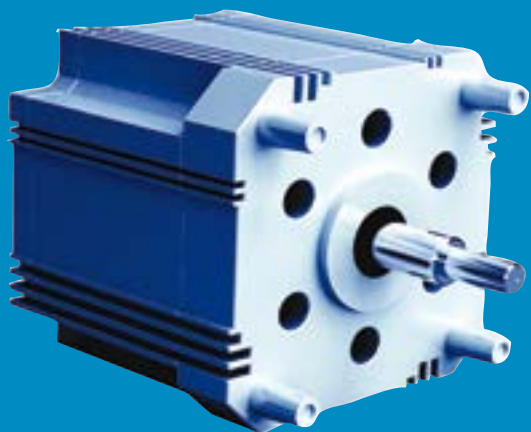

3 infrared sensors

A conventional touch-free hand dryer often has only one sensor, which can result in a failure to detect when hands are placed ready for drying. The JetDryer Business has three infrared sensors, which detect your hands from three different directions simultaneously, reducing the chance of errors. This means the unit operates accurately and only when required, reducing operating costs and saving you money.

The heart of the JetDryer Business

Advanced brush-less motor

By utilising a revolutionary high speed brush-less motor, the life of the JetDryer Business is extended. This will save you money in both servicing and future maintenance costs.

CONSUMABLES

JDBUSI-AF	Antibacterial filter (single)
JDBUSI-BR	Cleaning brush
JDWTS	Water tank sanitiser, disinfects & fragrances water tray (5 pack)
JDBUSI-GEL	Antibacterial gel (12 pack)

JetDryer Business

Advanced safety features

The JetDryer Business is packed with safety features, so you can feel comfortable knowing that you will be providing a solution that is reliable, safe and effective:

- A timer automatically shuts the dryer off after a set period;
- A temperature sensor stops the motor at temperatures over 70°C;
- The unit has a self-diagnosis function which monitors and reduces errors;
- A power monitoring circuit shuts off the unit if power input surges above or below 20%. The unit then notifies you using an LED display.

Servicing and maintenance

Fitting, servicing and maintenance of the JetDryer Business is extremely easy, saving you time and money and keeping your washroom in excellent shape.

Gel blocks

The exclusive gels for the JetDryer Business are sold in packs of 12, and each gel will last for around a month at a time. The gels are made from natural sources and are chemical-free. The JetDryer gel blocks perform three functions in one:

1. Moisturising the user's hands during use;
2. Providing a sanitizer for both the user and the JetDryer unit;
3. Adding a fragrant aroma to the washroom.

Simple maintenance

The JetDryer Business has a simple, removable drip tray, which collects any surplus water and eliminates water dripping onto the floor.

Choice of colours

The JetDryer Business comes in a choice of two stylish and elegant colours, improving the appearance of the premises and adding a touch of modern style to any washroom environment.

Silver

Metallic silver styling is modern and clean, ideal for environments that need to impress.

JDBUSI-S

White

Designed to blend in against the white décor of washrooms, the classic white colour is both elegant and discrete.

JDBUSI-W

JetDryer Business²

The economical
high-speed hand dryer

JetDryer Business²

The JetDryer Business² creates a jet airflow that will dry your hands within 10 seconds. It also adopts CPU technology with a wide LED display. A concealed switch allows you set the unit at two heat levels: 1600 watts (heater on) and 800 watts (heater off). The JetDryer Business² is fitted with an antibacterial filter and air freshener as standard.

Advanced brush-less motor

The JetDryer Business² is based on a simple yet powerful idea – using the heat from its own motor to provide the warm air used to dry the user's hands.

The brush-less motor saves energy as it consumes only 800 watts of power. This means the JetDryer Business² uses much less power than conventional warm air hand dryers, saving money and reducing your carbon footprint.

Gel blocks

The exclusive gels for the JetDryer Business² are sold in packs of 12, and each gel will last for around a month at a time. The gels are made from natural sources and are chemical-free. The JetDryer gel blocks perform three functions in one:

1. Moisturising the user's hands during use;
2. Providing a sanitizer for both the user and the JetDryer unit;
3. Adding a fragrant aroma to the washroom.

JetDryer JetLite

The high-speed hand dryer
just got smaller, greener & brighter

JetDryer JetLite

Energy efficient, compact and cost effective, the JetDryer JetLite is a fast, hygienic way to dry your hands.

Better for the environment

With annual cost savings of up to 85% compared to conventional dryers, the JetDryer JetLite is an excellent choice for facilities and purchasing managers looking for a rugged and energy efficient solution.

Vandalism resistant

The JetDryer JetLite features a strong vandalism-resistant die cast aluminium construction.

Space saving

The JetDryer JetLite performs very well when compared to much larger models, but comes in a smaller size for environments where space is at a premium.

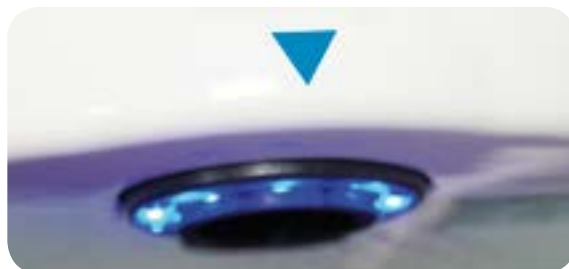

Unique and ergonomic design

The JetDryer JetLite features an ergonomic design, with unique high brightness blue LED lights which shine on the user's hands. This makes the JetDryer JetLite an excellent choice for environments needing a compact and aesthetically pleasing hand dryer solution.

Technical Specifications

Item category	Performance
Model Number	JDLITE-S & JDLITE-W

JetDryer Mini

The compact, high-speed hand dryer with water catchment

JetDryer Mini

The most compact hand dryer with water catchment in the range, the JetDryer Mini is a fast, hygienic and safety conscious hand drying option.

Space saving

The JetDryer Mini performs very well when compared to much larger models, but comes in a smaller size for environments where space is at a premium.

Better for the environment

With annual cost savings of up to 85% compared to conventional dryers, the JetDryer Mini is an excellent choice for facilities and purchasing managers looking for a rugged and energy efficient solution.

Keeps walls and floors dry

The JetDryer Mini collects water in an integrated catchment tray, which is easily emptied during routine maintenance. This important feature helps keep bathrooms safe by reducing slip hazards.

JetBot

The faster, friendlier & more efficient
hand dryer for children

The JetBot hand dryer is mounted 840mm off the ground to suit average heights for 3-10 year olds

A specially designed scratch and water resistant backing board is mounted to the wall behind the JetBot hand dryer. Printed with UV resistant inks to ensure long life, the board displays the rest of JetBot's body, conveys the important environmental message, and offers an effective splashback for wall protection.

JetBot Hand Dryer

The new fun way of introducing children to drying their hands, and they can help save the planet too!

Better for the environment

The JetDryer JetBot offers annual cost savings of up to 85% compared to conventional hand dryers, and potentially even more when compared to paper towels.

By teaching our children the benefits of using energy efficient products, they will help reduce our carbon footprint, which will provide a better environment for their future and generations to come.

Fun and educational

The JetDryer JetBot is supplied with a specially designed backing board which is mounted to the wall behind the hand dryer. The board is both scratch and water resistant, and the graphics are printed with special UV resistant inks to ensure long life. This provides an effective splashback, whilst also conveying to kids the important environmental benefits of using jet hand dryers.
